

Andgar's Wet Pack Drum Filler

4 Times As Fast Without The Splish Splash

Keep your puree pouring because the filling nozzle of our 55-gallon drum filler can automatically fill up to four drums on a single pallet. There's no more moving hoses from drum to drum and no need for a human operator, which protects the purity of the product.

Pallets run along a conveyor, eliminating the need for labor to load and unload drums and is run by an easy to operate touch screen system.

The Andgar Advantage

- Fills up to four 55-gallon drums without unloading
- Limits human contact with puree
- Automated scales weigh drums to eliminate spilling and overflowing
- Stainless steel construction for easier cleaning
